## Year 13 Destinations

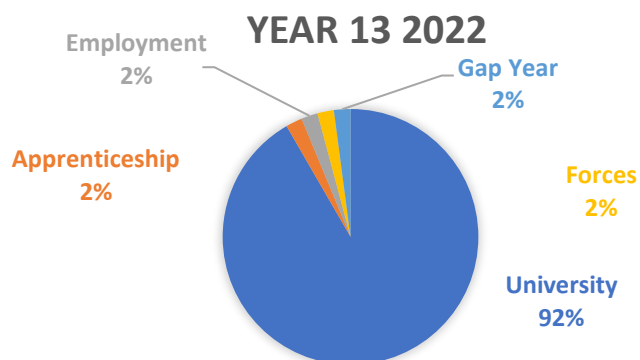

### Year 13 2023

This year has seen an increase in apprenticeship schemes, perhaps reflected in the greater emphasis about apprenticeships in school. There is an increase in gap years, all taken to travel. It is worth noting that all those going on a gap year, aim to go to University in 2024.

### Year 13 2022

This year saw more students continuing into Higher Education and fewer having a gap year possible due to travel uncertainty after Covid.

### Year 13 2021

The number of students continuing into Higher Education is excellent. There is an increase in students taking a gap year perhaps reflecting travel restrictions being lifted and the uncertainty surrounding the cost of living.
